## FACILITIES FOR ALTERNATE SOURCES OF ENERGY

The Assam Royal Global University has set up a 165 kbh Roof Top Solar Plant on the campus to reduce dependence on non-renewable forms of energy.

**Solar Panels are installed on the terraces of Blocks A, B, C and the Harsha Hostel of the university.**

The University features a biogas plant as a vital alternative energy source, demonstrating its commitment to sustainability and reducing reliance on traditional fuels, thus fostering a greener campus environment.

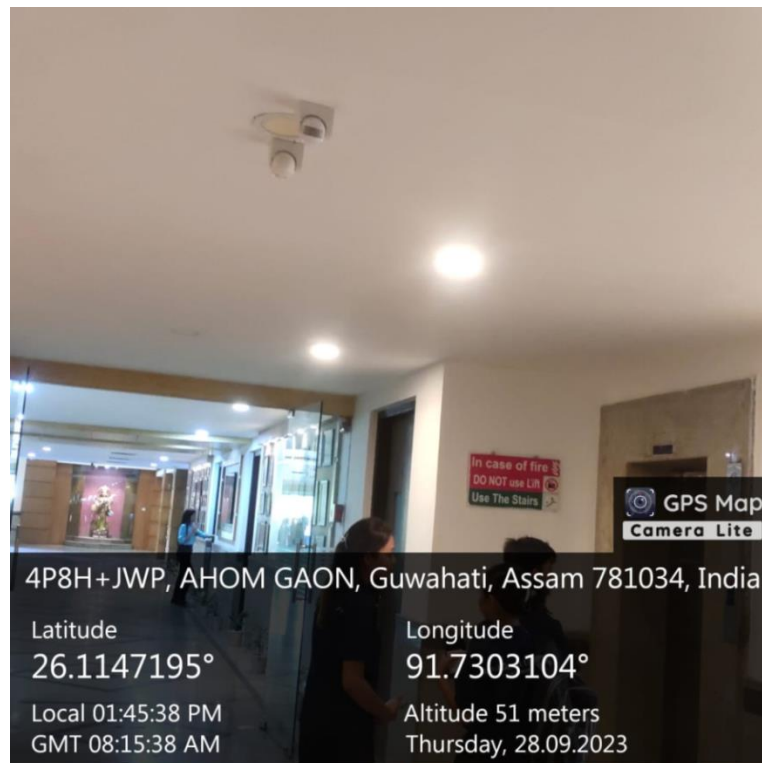

**Biogas plant is installed behind D-Block of the University**

The University's solar plant contributes power to the grid, serving as an innovative alternative energy source that enhances sustainability efforts and reduces environmental impact on campus and beyond.

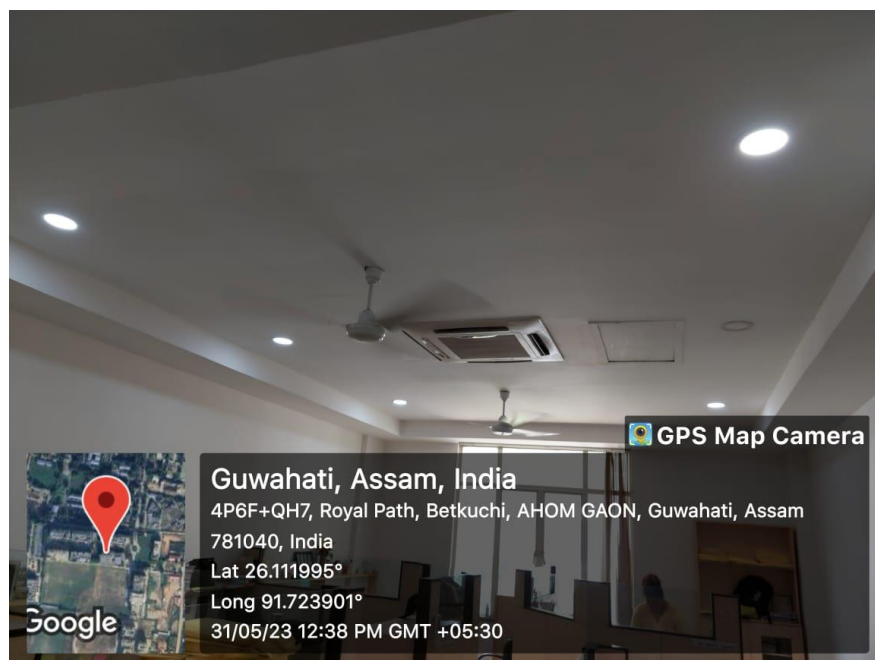

**Wheeling to the Grid**

The University has sensor-based lighting system at key areas like the A-block and the IT cell.

**Sensor based lighting in A-Block.**

LED bulbs are installed in all the buildings throughout the campus to save electricity.

**LED bulbs are used in the offices and classrooms throughout the university**
