INTRODUCTION

E-Governance is not just a necessity but the cornerstone of modern administrative efficiency and transparency. To ensure the comprehensive implementation of e-governance across the university, all departments have been integrated into a single network, providing faculty, staff, students, and other stakeholders access as users. This network includes key areas such as Planning & Development, Administration, Finance and Accounts, Student Admission & Support, Examination, and Teaching-Learning. Each of these areas is equipped with dedicated portals and modules meticulously designed to simplify day-to-day activities, with an emphasis on reducing paper usage and moving towards a more environmentally-friendly, paperless administration.

In embracing e-governance, our university demonstrates a commitment to enhancing efficiency, transparency, and sustainability in its administrative processes. Through the innovative university management system and integrated network, we aim to provide a seamless and user-friendly experience to all members of our academic community, enabling better service delivery and informed decision-making. This digital transformation represents a significant step towards a more modern and progressive educational institution.

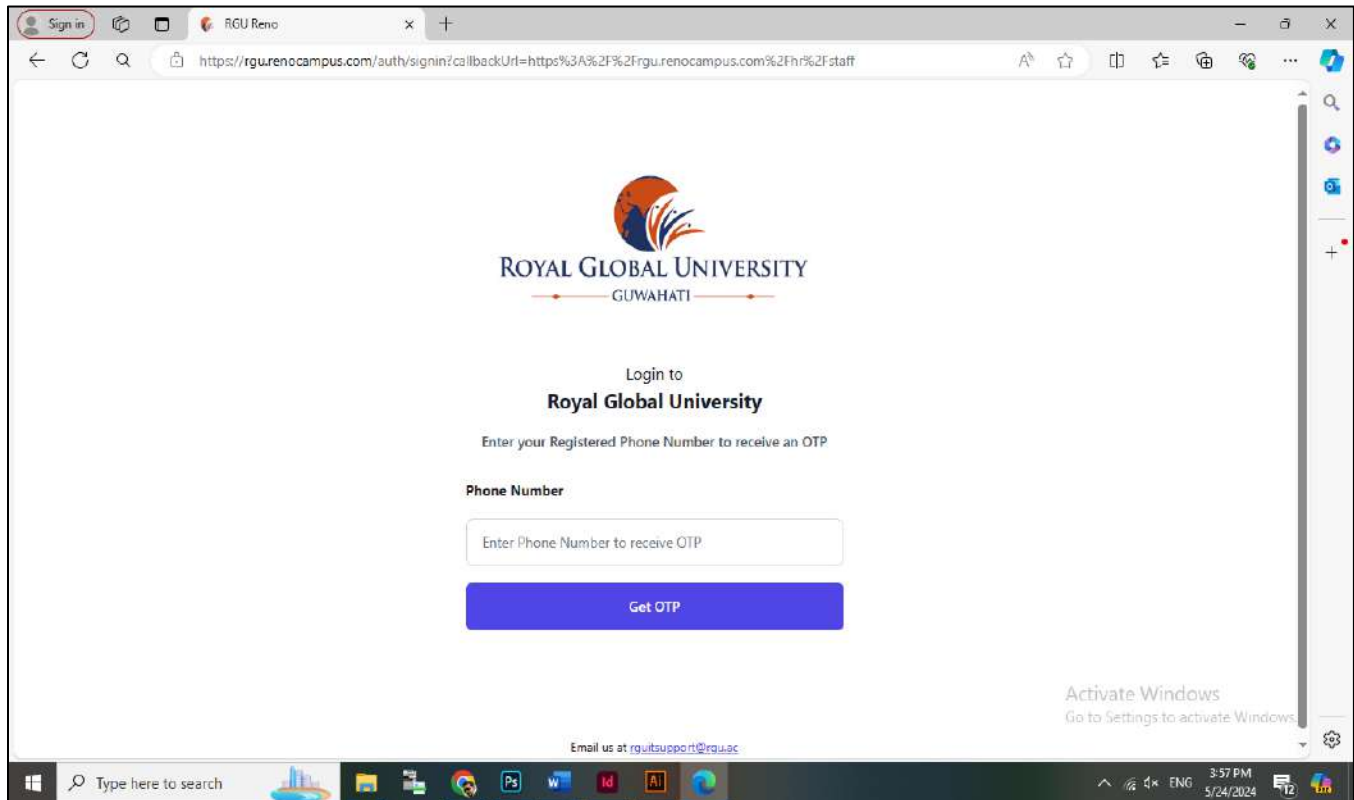

The Assam Royal Global University recognized this need and took a pioneering step in the form of an in-house developed ERP known as RoyalNet (<https://royalnet.rgu.ac/>) from its inception and Renocampus (<https://rgu.renocampus.com/>) from 2022. These systems were designed to support and automate processes in alignment with our institution's core principle of shared governance.

The University Learning Management System RoyalNET and Renocampus has been a part of this journey assisting the University in maintaining quality through centralized automated administration in all its academic and non-academic endeavours. Over time, up gradations were invited in all aspects of the institution resulting in refining and polishing the mode of governance applied in the institution. RGU has introduced a combination of e-tools enhancing the effectiveness of the teaching- learning apparatus to address the various issues related to the student admission, teaching- learning, examination, publication of results and library automation. With every step taken in direction towards progress, the University has been able to add innovative strategies in its model of governance for encompassing an educational scenario that is transparent to its beneficiaries, efficient in meeting the needs of the time and accountable to all the expectations surrounding an educational institution.

USER INTERFACE OF ROYALNET

USER INTERFACE OF RENOCAMPUS

The implementation of e-governance has been concentrated into primarily 4 areas:

1. Administration:

The University has incorporated updated strategies to handle the huge bulk of data that cross in the administrative level. A course structure was developed in line with NEP 2020 during the academic session 2022-23. And recently the NEP 2020 has been successfully implemented from the academic session August 2023 in the curriculum with all the course program successfully marked with the respective CO, PO and PSOs. These were made available in the University website for the reference of the aspirants. The website was updated and the stakeholders were given the facility of reporting their grievances.

The staff and employee can log in to <https://rgu.renocampus.com/> to manage their profile, can check leave details, salary details, maintain class attendance, upload course materials.

ROYALNET DASHBOARD

The screenshot shows the ROYALNET dashboard for a teacher. The top navigation bar includes the ROYALNet logo and a user profile for Dr. Anuradha Devi. The main dashboard area features several key metrics: 620 Students, 40 Teachers, 560 Subjects, and 0 Attendance. A central profile card for Dr. Anuradha Devi, Teacher, displays her contact information: Username (anuradha.devi@rgi.edu.in), Email (anuradha.devi@rgi.edu.in), Phone (9435102678), and Address (C/o Dr. Pradyut Kr. Goswami, Green Enclave, Near Ashirbad Bibah Bhavan, Six Mile, Guwahati - 781022, Assam). A 'Notice' section lists three items: General Guidelines Examinations Cell No. RGU/COE/Notice/2019-20/Even Sem./098 Date: 14th J., General guidelines, and Notice for Re-Regist. This is for information to all the students under The Assam Royal Global Univers.. A sidebar on the left contains navigation options: Dashboard, Student, Teacher, Subject, Exam Schedule, Mark, Routine, Student Attendance, Online/Offline Attendance, Cumulative Attendance, Event, and Holiday. The footer indicates the system was developed by Arsaviva Technology.

EMPLOYEE DETAILED INFORMATION RENOCAMPUS

The screenshot displays the 'Employee Detailed Information' page on the Renocampus system. The page header shows the Royal Global University logo and navigation tabs for Basic, Personal, Academic, Work Experience, Salary, and Research & Publication. A sidebar on the left includes a '+ View Profile' button and links for HR, Profile, Leaves, and Logout. The main content area is titled 'Profile' and shows 'Basic Details' for an employee. The fields are: Employee ID (1491), Employee Profile Pic (Choose File, No file chosen), Title (Mr.), First & Last Name (Bijoy, Kalita), and Middle Name (S).

After login the home screen appears including employee detailed information

2.Finance and Accounts: The University relies on the values of transparency in financial transactions and hence has opted to resort to online means of fee payment. This has reduced the obstacles of direct payment and is found to be a safer mode of financial transaction that is automatically documented.

User interface of ERP of Accounts section

The screenshot shows the 'Fee for Admission Year 2023' report in the ERP system. The report title is 'Fee for Admission Year 2023' and it states 'This report shows new students that have been issued a bill for 2023'. The total number of students is 2924, and the number of students in the selected filter is also 2924. The report includes a table with columns for Roll Number, Name, Application No, Contact, School, Course, Hostel, Transport, and Collect Fee. The table lists four students: Aniruddha Mushahary, Rohib Khan, Chou Allan Mein, and Eksha Erich Laloo Shytia. Each student has a 'Collect Fee' button next to their row.

3. Student Admission and Support:

The admission procedures are one of the most tedious tasks in an educational institution and to ensure impartiality in its functioning, the University has resorted to online modes of application for admission. This has made the admission procedures far more transparent, systematic and efficient. The University's Renocampus and Nopaper Forms managed the admission list and published the selected and waiting list of candidates based on the set parameters within the scheduled time and with minimum or no errors. Student registration is also facilitated through the University portal.

4. Examination:

This is an area where the institution has witnessed great changes during this academic year with the digitalization of the examination section. Implementing an ERP system in the examination branch of a university streamlines administrative processes, enhancing efficiency and accuracy. With centralized data management, it facilitates seamless coordination between departments, ensuring timely scheduling of exams, result processing, and academic record management. Real-time access to information empowers administrators to make informed decisions swiftly, while automated workflows reduce manual errors and redundancies. Overall, the integration of ERP revolutionizes the examination management system, fostering a smoother experience for students and staff alike.

- Select Subject:** A dropdown menu with "Numerical Methods & LPP: Semester 5" selected.
- Total Maximum Marks:** A text input field containing the value "100".
- Enter CE Details:** A section header for the next part of the form.
- CE Maximum Marks:** A text input field containing the value "15".

5. Library:

The library gives access to a wide range of resources including books, study areas and e- books covering all departments viz. engineering, management, architecture, law, commerce, fashion, fine arts, nursing, pharmacy, hotel & tourism management etc. The central library at RGU can be acclaimed as one of the advanced libraries of not only Assam or the North-East but also regionally and nationally both in terms of quality and quantity covering 23 schools and more than 130 courses. The library has a huge collection of approximately 25000+ books. Apart from this, the library holds a special north-east collection, competitive books corner and fiction/nonfiction corner. RGU E-Library aims to provide online resources, professional support and guidance to all students whenever, and from wherever they have chosen to study. The library has 18000+ e-books and more than 65000 e- journals. Apart from this, it has various e-resources including e-journals, e-Books, and e- databases under different areas that can be accessed by its users. The database for the entire collection can be accessed through Online Public Access Catalogue (WebOPAC). The OPAC software allows users to search books on parameters such as title, author's name, volume, and keywords with mere clicks and enables the librarians to catalogue different genres of books and maintain its database online. The library management is done by ILS SOUL 2.0 server platform and barcode system (Jan, 2013). DSpace is used for maintaining the Institutional Repository of the entire university. As a member of DELNET, the library avails various facilities of member institutions through resource sharing on demand from the users as and when required. It provides ready reference services like content list service, using both offline and online sources of information to the users.

Enabling E-Governance via IT Support Up-gradation

Since its inception, The Assam Royal Global University has been at the apex of creating a state-of-the-art IT infrastructure which has led to the making an unparallel e-governance system. Tabulated below is the adoption of newer technology which have been efficient enablers for exercising e-governance in the University.

CCTV Cameras

Cumulative number of CCTV Camera (2018-2023)

Year	2018-19	2019-20	2020-21	2021-22	2022-23
Number	200	250	320	400	445

Projectors

Cumulative number of Projectors (2018-2023)

Year	2018-19	2019-20	2020-21	2021-22	2022-23
Number	195	203	215	228	242

Biometric machines

Cumulative number of Biometrics (2018-2023)

Year	2018-19	2019-20	2020-21	2021-22	2022-23
Number	03	03	05	05	11

Turnstile Gates

Cumulative Access Control System (Turnstile Gates/Boom Barriers/Access Controllers/RFID Readers (2018-2023)

Year	2018-19	2019-20	2020-21	2021-22	2022-23
Number	02	02	02	02	02

Internet related technology

Year	2018-19	2019-20	2020-21	2021-22	2022-23
Mbps	500	500	500	750	1000

Some noteworthy technology support upgradation over the years:

Implementation of WiFi in the Campus

- *Enabled Wi-Fi Services in Hostels and Academic Blocks*
- *Enabled teachers to use laptops for teaching & learning purpose*
- *Improve the Wi-Fi Connection Speed for the Users*
- *Increased the user capacity to connect more users at single time*
- *Increase the Wi-Fi coverage for the users*
- *Users can seamlessly roam from one location to another*
- *Enabled Learning beyond the classroom walls.*
- *Allowed the parents, students and teachers to be more engaged with each other.*
- *Helped the students for encouraging students to stay on task, and engage in classroom activities and discussion.*
- *Students and teachers were able to share notes and assignments easily using free livetools like googledoc, one note, email etc.*

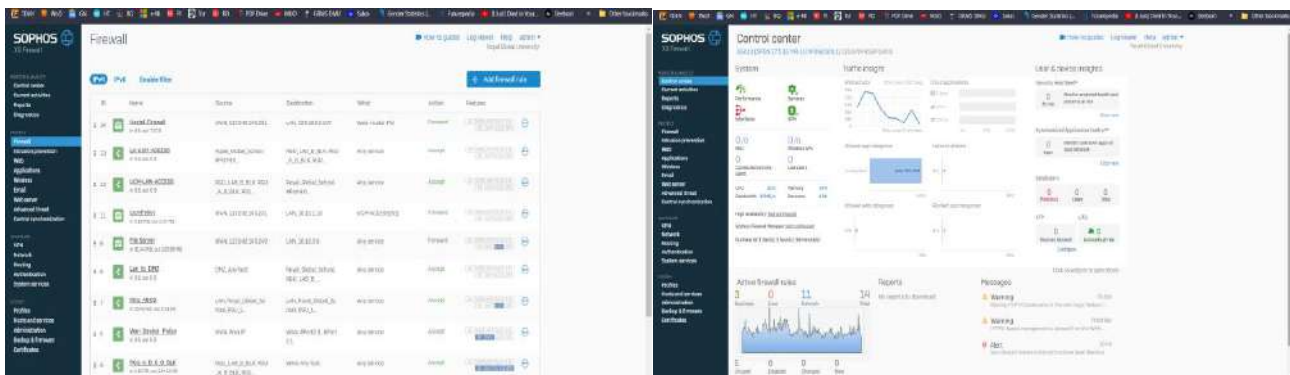

SURVEILLANCE

The campus is equipped with 300+ IP based CCTV cameras with 24/7 recording. The system is powered with a 15 minutes power backup from an UPS and diesel generator backup in case of mains power failure. Data is retained for 14 days on all cameras.

NETWORK SECURITY

We use technologies from Sophos Group to secure our network. Along with UTMs from Sophos, we use Raspberry Pi based Honeypots to track and secure our network. Each building has sub layers of security from Sophos with additional honeypots.

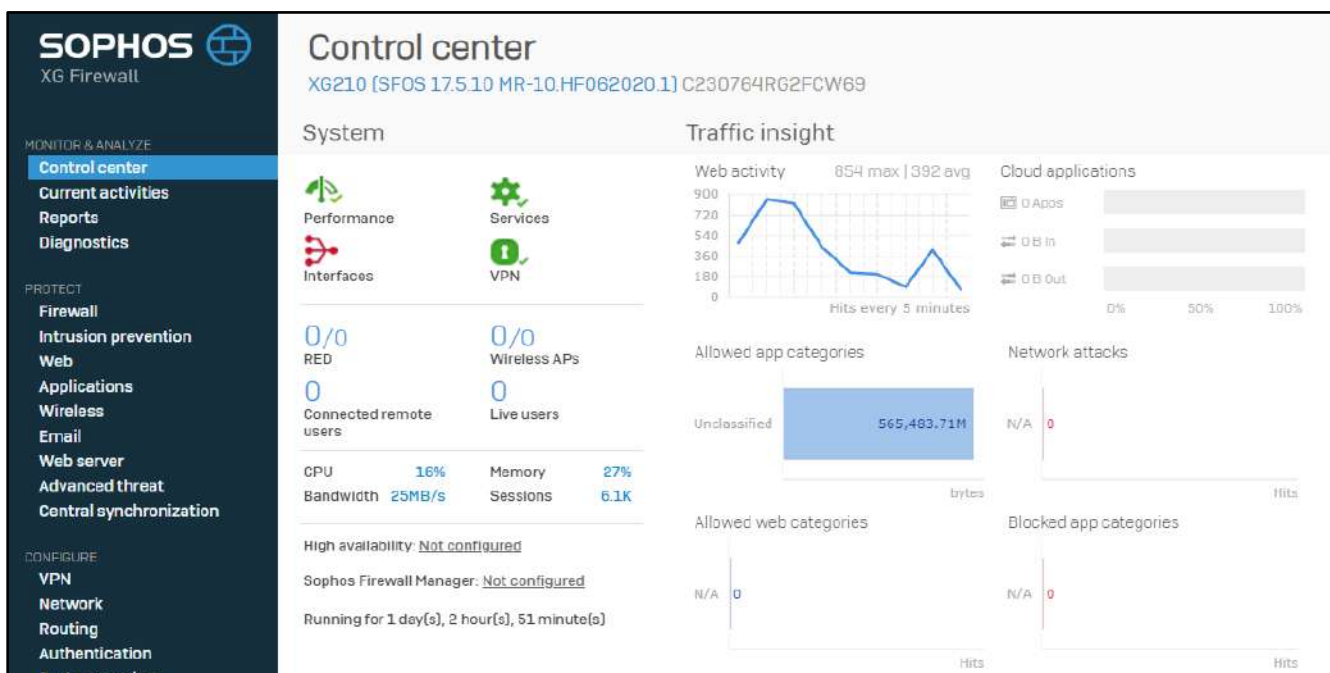

COMMUNICATION SYSTEMS

We have a robust email server based on the Microsoft's Office 365 framework. We provide 100GB of mail server space and 1TB of cloud storage space to all individual faculty members, administrative staff, and doctoral candidates. Parallely, the WhatsApp platform is used for unofficial communications, which is getting transferred to Microsoft's Kaizala platform. Microsoft's Kaizala can be backlinked to our Microsoft Outlook backbone. We have VoIP based telephony across the campus based on the open-source Asterix platform, which is connected to a PRI service from BSNL to provide external call routing services.

INTERNET FACILITY

RGU has a 1000Mbps (1:1) ILL from BSNL and a backup 10Mbps (1:1) ILL from Reliance Jio, which is distributed across all the blocks through nine virtual local area networks.

Internet is provided in all the hostels through Wi-Fi from 7 PM to 7 AM on weekdays and all 24 hours on Sundays. The authentication process is through a captive gateway for students, and faculty and administrative staff can connect directly over Wi-Fi or Ethernet.

Additionally, with the help of Reliance Jio, there is an alternate Wi-Fi network for all students and employees using Jio's GSM services. Non-Jio customers can also access the services with a limited data transfer of 35MB per login for emergency connectivity.

LOCAL & CLOUD SERVERS

RGU has a HP G8 series Datacentre that runs local applications. Its mail and storage run on Microsoft Cloud. The website is hosted in GoDaddy cloud as of now and will be soon migrated to AWS servers.

CONCLUSION

The Assam Royal Global University has taken significant steps towards the implementation of information technology for the management of various aspects of the university. These initiatives have significantly improved the efficiency and accuracy of university operations and have provided students and employees with convenient access to a range of services. The university will continue to invest in e-governance initiatives to further enhance the quality of its services and improve the overall experience of its students and employees.
